COMMUNICATION

Commissioner for Patents
Washington, D.C. 20231

On Forms 1449 which accompany this Communication, Applicant's Representatives have provided the Examiner with a copy of a research proposal entitled "DNA Binding by a New Motif: Transformation of EF-Hands to HTH Motifs". The research proposal was one of three proposals that were part of a packet of application materials sent by Dr. Sonya J. Franklin, the named inventor of the above-identified application, to prospective employers in response to advertisements for faculty positions which requested those research proposals. It is Dr. Franklin's understanding that the research proposals were only distributed confidentially to, and would be discussed privately with Dr. Franklin by, faculty who would vote on whether or not to offer her employment.

Thus, it is Applicant's Representatives position that there was insufficient accessibility of the above-referred to research proposal to the interested public to render the proposal a publication. Therefore, it is Applicant's Representatives position that the research proposal is not a "printed publication" under 35 U.S.C. § 102(b).

The Examiner is invited to contact the Applicant's Representatives at the below-listed telephone number if there are any questions regarding this communication.

Respectfully submitted,

SONYA FRANKLIN,

By her Representatives,
SCHWEGMAN, LUNDBERG, WOESSNER & KLUTH, P.A.
